ort
ctions related to climate change impacts, mitigation and adaptation
r to derive solutions for tackling existing and emerging threats and
support decision-making in climate change mitigation and adaptation policies at
European and global levels, including through the use of AI and other digital solutions;

- increased climate change mitigation in the primary sectors, including by means of reducing their GHG emissions and other pollutants, maintaining natural and man-made carbon sinks and increasing uptake and storage of carbon in ecosystems, taking into account trade-offs with regard to ecosystems;
- improved capacity to climate change of the ocean, sea, water and soil systems and related sectors to adapt to climate change, including by means of unlocking the potential of nature-based solutions;
- sustainable management of scarce resources, in particular soils and water, therefore mitigating climate related risks, especially desertification and erosion, thanks to informed decision-makers and stakeholders and the integration of adaptation measures in relevant EU policies.

DEFINITIONS	
Critical risk	<p>A critical risk is a plausible event or issue that could have a high adverse impact on the ability of the project to achieve its objectives.</p> <p>Level of likelihood to occur (Low/medium/high): The likelihood is the estimated probability that the risk will materialise even after taking account of the mitigating measures put in place.</p> <p>Level of severity (Low/medium/high): The relative seriousness of the risk and the significance of its effect.</p>
Deliverable	<p>A report that is sent to the Commission or Agency providing information to ensure effective monitoring of the project. There are different types of deliverables (e.g. a report on specific activities or results, data management plans, ethics or security requirements).</p>
Impacts	<p>Example: <i>The deployment of the advanced forecasting system enables each airport to increase maximum passenger capacity by 15% and passenger average throughput by 10%, leading to a 28% reduction in infrastructure expansion costs.</i></p>
Milestone	<p>Control points in the project that help to chart progress. Milestones may correspond to the achievement of a key result, allowing the next phase of the work to begin. They may also be needed at intermediary points so that, if problems have arisen, corrective measures can be taken. A milestone may be a critical decision point in the project where, for example, the consortium must decide which of several technologies to adopt for further development. The achievement of a milestone should be verifiable.</p>
Objectives	<p>The goals of the work performed within the project, in terms of its research and innovation content. This will be translated into the project's results. These may range from tackling specific research questions, demonstrating the feasibility of an innovation, sharing knowledge among stakeholders on specific issues. The nature of the objectives will depend on the type of action, and the scope of the topic.</p>
Outcomes	<p>The expected effects, over the medium term, of projects supported under a given topic. The results of a project should contribute to these outcomes, fostered in particular by the dissemination and exploitation measures. This may include the uptake, diffusion, deployment, and/or use of the project's results by direct target groups. Outcomes generally occur during or shortly after the end of the project.</p> <p>Example: <i>9 European airports adopt the advanced forecasting system demonstrated during the project.</i></p>
Pathway to impact	<p>Logical steps towards the achievement of the expected impacts of the project over time, in particular beyond the duration of a project. A pathway begins with the projects' results, to their dissemination, exploitation and communication, contributing to the expected outcomes in the work programme topic, and ultimately to the wider scientific, economic and societal impacts of the work programme destination.</p>
Research output	<p>Results generated by the action to which access can be given in the form of scientific publications, data or other engineered outcomes and processes such as software, algorithms, protocols and electronic notebooks.</p>
Results	<p>What is generated during the project implementation. This may include, for example, know-how, innovative solutions, algorithms, proof of feasibility, new business models, policy recommendations, guidelines, prototypes, demonstrators, databases and datasets, trained researchers, new infrastructures, networks, etc. Most project results (inventions, scientific works, etc.) are 'Intellectual Property', which may, if appropriate, be protected by formal 'Intellectual</p>

Criteria de evaluación (RIAs e IAs)

EXCELLENCE

- ✓ Clarity and pertinence of the **project's objectives**, and the extent to which the proposed work is ambitious, and goes **beyond the state-of-the-art**.
- ✓ Soundness of the proposed **methodology**, including the underlying concepts, models, assumptions, interdisciplinary approaches, **appropriate consideration of the gender dimension** in research and innovation content, and the quality of **open science practices** including sharing and management of research outputs and engagement of citizens, civil society and end users where appropriate.

IMPACT

- ✓ Credibility of the **pathways** to achieve the expected **outcomes and impacts** specified in the work programme, and the likely scale and significance of the contributions due to the project.
- ✓ Suitability and quality of the **measures to maximize expected outcomes and impacts**, as set out in the dissemination and exploitation plan, including communication activities.

QUALITY AND EFFICIENCY OF THE IMPLEMENTATION

- ✓ Quality and effectiveness of the **work plan**, assessment of risks, and appropriateness of the effort assigned to work packages, and the resources overall.
- ✓ Capacity and role of **each participant**, and extent to which the **consortium** as a whole brings together the necessary expertise.

Proposals aspects are assessed to the extent that the proposed work is within the scope of the work programme topic

Índice

- A modo de recordatorio
- Aspectos clave
- Detalles en el WP 2023-2024

Aspectos clave en la propuesta

Your proposed work must be **within the scope** of a work programme **topic**

You need to demonstrate that your idea is **ambitious** and goes **beyond the state of the art**

Your scientific **methodology** must take into account **interdisciplinary, gender dimension** and **open science** practices. It must **not** significantly **harm the environment**

You should show how your project could contribute to the **outcomes and impacts** described in the work programme (**the pathway to impact**)

You should describe the planned measures to **maximise the impact** of your project ('**plan for the dissemination and exploitation including communication activities**')

You should demonstrate the **quality** of your **work plan, resources and participants**

EXCELLENCE

IMPACT

IMPLEMENTATION

Políticas y aspectos horizontales

These aspects must normally be considered in **all HE calls** (unless explicitly mentioned in the topic description).

Specific calls may include other aspects to take into account

Open Science across the programme

Gender dimension in R&I content

Do no significant harm principle (DNSH)

- **SSH**
- **International cooperation**
- **Multi-actor approach**
- **..... Specific conditions**

Artificial intelligence (AI)

Pathways to impact

Measures to maximise impact

“Open Science” en todo el programa

Open Science

Open science is an approach based on open cooperative work and systematic sharing of knowledge and tools as early and widely as possible in the process. Including active engagement of society

Mandatory immediate Open Access to publications: beneficiaries must retain sufficient IPRs to comply with open access requirements;

Data sharing as ‘open as possible, as closed as necessary’: mandatory Data Management Plan for FAIR (Findable, Accessible, Interoperable, Reusable) research data.

- Work Programmes may incentivize or oblige to adhere to **open science practices** such as involvement of citizens, or to use the **European Open Science Cloud**.
- Assessment of open science practices through the **excellence award criteria** for proposal evaluation. Under **quality of participants** previous experience on open sciences practices will be evaluated positively.
- Dedicated support to **open science policy actions**.
- **Open Research Europe** publishing platform (<https://open-research-europe.ec.europa.eu/>).

Igualdad de Género en Horizonte Europa

- Eligibility: **Gender Equality Plan** (applicable from 2022 onwards for public bodies, research organizations or higher education institutions)
- Award Criteria: **Integration of the gender dimension**
- Ranking Criteria: **Gender balance** (for “ex aequo” proposals)

Igualdad de Género en Horizonte Europa

La dimensión de Género en el contenido de la I+D+i

Gender Dimension

Addressing the gender dimension in research and innovation entails taking into account sex and gender in the whole research & innovation process.

The **integration of the gender dimension** into R&I content is **mandatory**, unless it is explicitly mentioned in the topic description

Why is gender dimension important?

- Why do we observe differences between women and men in infection levels and mortality rates in the COVID-19 pandemic?
- Does it make sense to study cardiovascular diseases only on male animals and on men, or osteoporosis only on women?
- Does it make sense to design car safety equipment only on the basis of male body standards?
- Is it responsible to develop AI products that spread gender and racial biases due to a lack of diversity in the data used in training AI applications?
- Is it normal that household travel surveys, and thus mobility analysis and transport planning, underrate trips performed as part of caring work?
- Did you know that pheromones given off by men experimenters, but not women, induce a stress response in laboratory mice sufficient to trigger pain relief?
- And did you know that climate change is affecting sex determination in a number of marine species and that certain populations are now at risk of extinction?

El principio “do no significant harm (DNSH)”

European Green Deal

In line with the European Green Deal objectives, the research and innovation activities should not make a significant harm to any of the six environmental objectives (EU Taxonomy Regulation)

The **DNSH principle** needs to be taken into consideration in the **scientific methodology** and **impact** of the project.

However, **evaluators will not score applications in relation to their compliance with the DNSH principle** unless explicitly stated in the work unless explicitly stated in the work programme, (currently, this is the case only for actions in the European Innovation Council Work Programme 2021).

The six environmental objectives :

Climate change mitigation

Sustainable use & protection of water & marine resources

Pollution prevention & control

Climate change adaptation

Transition to a circular economy

Protection and restoration of biodiversity & ecosystems

Inteligencia Artificial

Trustworthy Artificial Intelligence

Due diligence is required regarding the trustworthiness of all AI-based systems/ techniques used or developed in projects funded under Horizon Europe.

Under Horizon Europe, the **technical robustness*** of the proposed AI based systems must be evaluated under the **excellence** criterion.

(*) Technical robustness refers to technical aspects of AI systems and development, including resilience to attack and security, fallback plan and general safety, accuracy, reliability and reproducibility.

AI-based systems or techniques should be, or be developed to become:

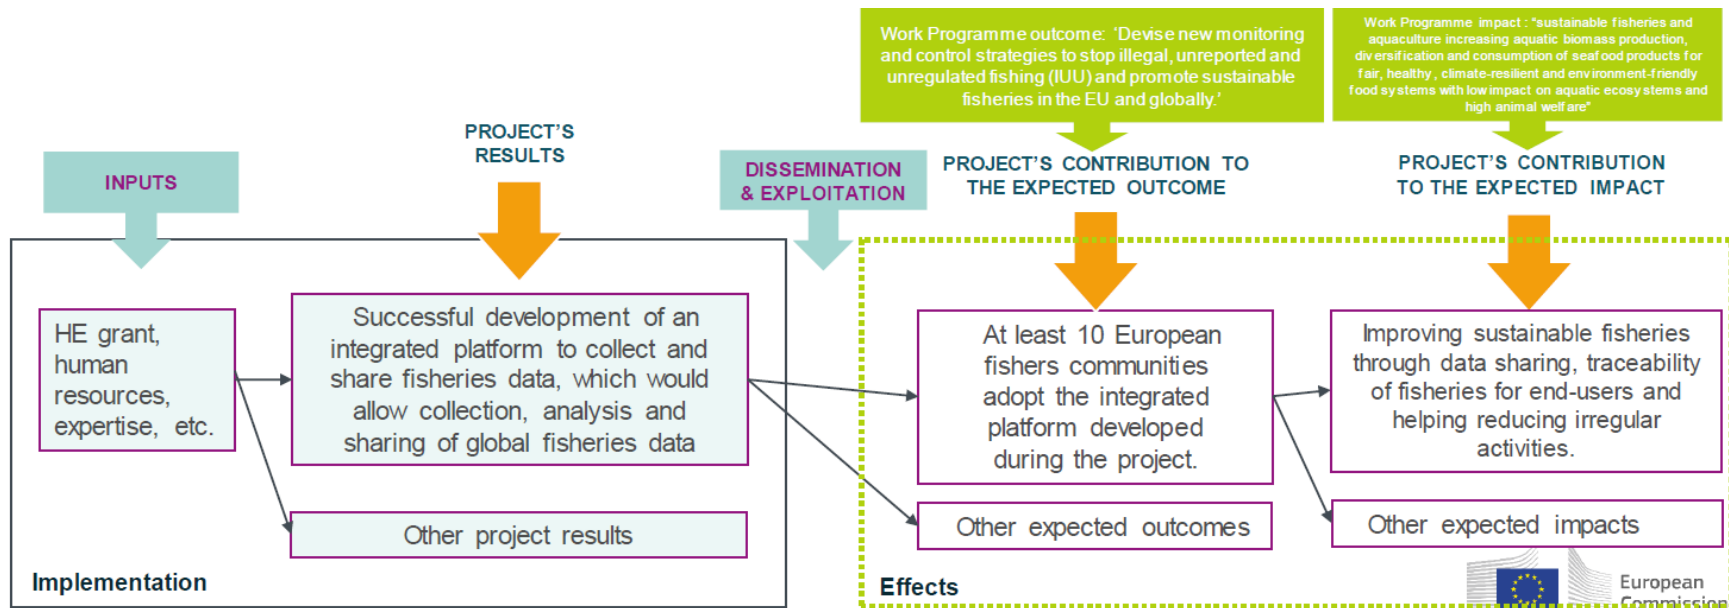

- **Technically robust, accurate and reproducible**, and able to deal with and inform about possible failures, inaccuracies and errors, proportionate to the assessed risk posed by the AI-based system or technique.
- **Socially robust**, in that they duly consider the context and environment in which they operate.
- **Reliable and function as intended**, minimizing unintentional and unexpected harm, preventing unacceptable harm and safeguarding the physical and mental integrity of humans.
- Able to provide a suitable explanation of its **decision-making process**, whenever an AI-based system can have a significant impact on people's lives.

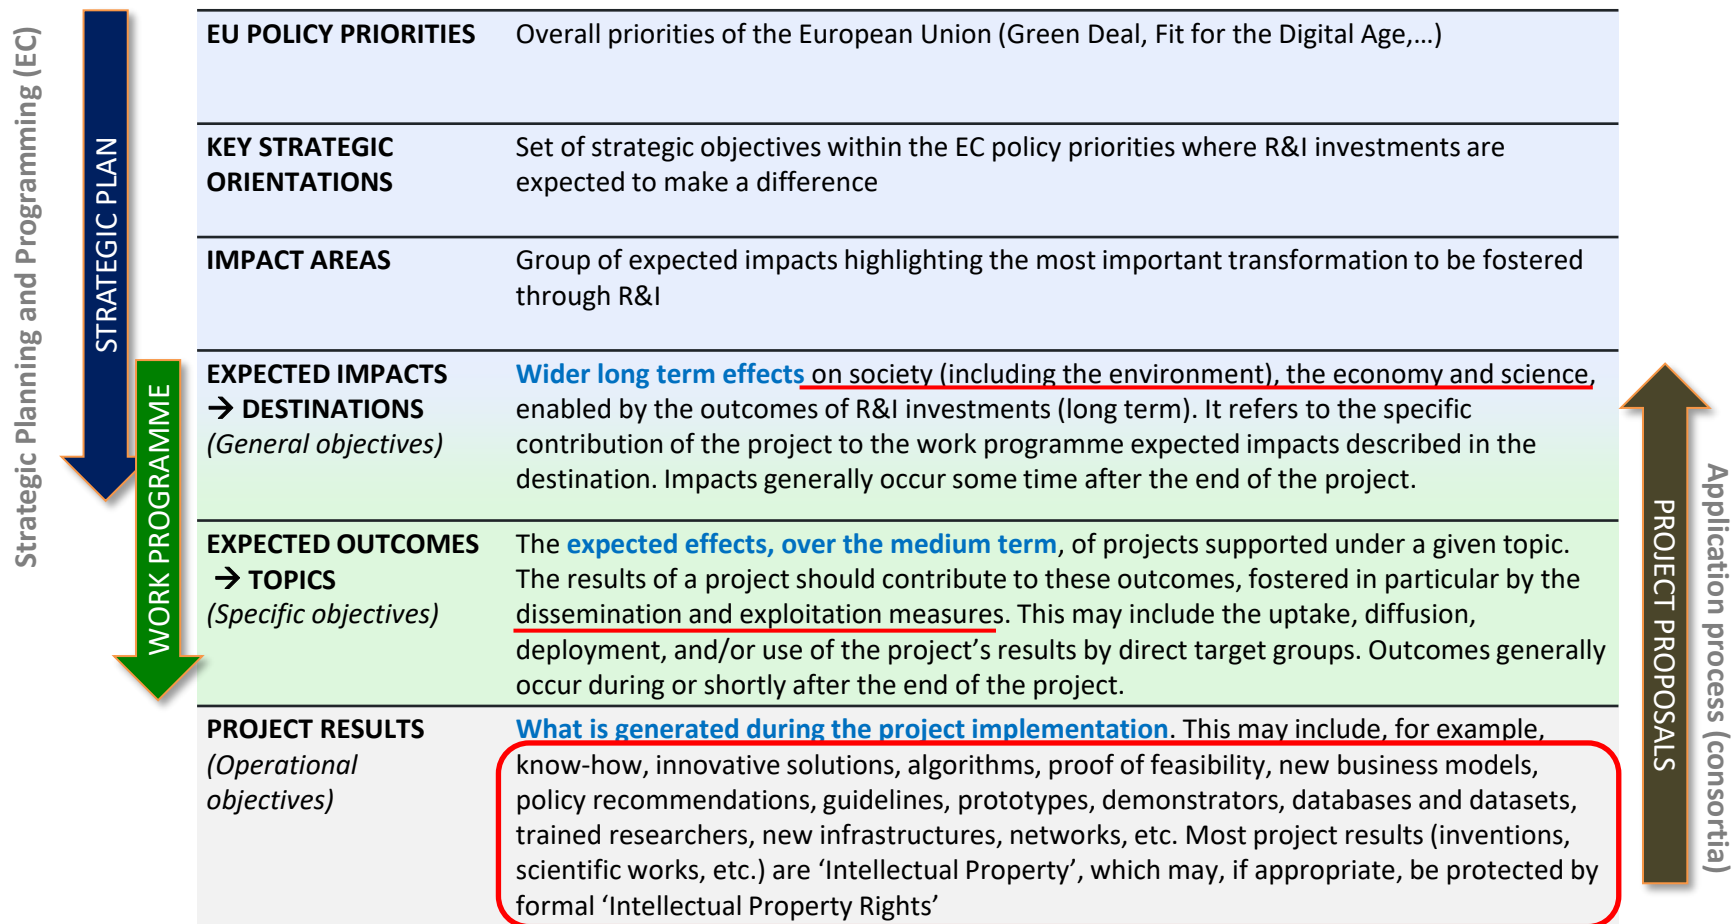

Describir el impacto de tu propuesta

Project's pathway towards impact

...by thinking about the specific contribution the project can make to the expected outcomes and impacts set out in the Work Programme.

Prioridades políticas → Resultados de los proyectos

Medidas para maximizar el impacto

Dissemination, exploitation and communication

To include a draft plan in proposal is an admissibility condition, unless the work programme topic explicitly states otherwise.

All measures should be **proportionate** to the scale of the project, and should contain **concrete actions** to be implemented both **during and after** the end of the project

Elements of the D&E&C plan + IP management

- **Planned measures** to maximise the impact of projects
- **Target groups** (e.g. scientific community, end users, financial actors, public at large) and **proposed channels** to interact
- **Communication measures** for promoting the project and its findings throughout the full lifespan of the project
- **Policy feedback** measures to contribute to policy shaping and supporting the implementation of new policy initiatives / decisions
- Follow-up plan to foster **exploitation/uptake** of the results
 - Comprehensive and feasible strategy for the **management of the intellectual property** (the provision of a results ownership list is mandatory at the end of the project)
 - If exploitation is expected primarily in non-associated third countries, give a convincing justification that this is still in the Union's interest.

Resumen del Impacto (Impact Canvas)

NEW

KEY ELEMENT OF THE IMPACT SECTION

SPECIFIC NEEDS	EXPECTED RESULTS	D & E & C MEASURES	TARGET GROUPS	OUTCOMES	IMPACTS
<p><i>What are the specific needs that triggered this project?</i></p> <p>Example 1 Most airports use process flow-oriented models based on static mathematical values limiting the optimal management of passenger flow and hampering the accurate use of the available resources to the actual demand of passengers.</p> <p>Example 2 Electronic components need to get smaller and lighter to match the expectations of the end-users. At the same time there is a problem of sourcing of raw materials that has an environmental impact.</p>	<p>What do you expect to generate by the end of the project?</p> <p>Example 1 Successful large-scale demonstrator: Successful large-scale demonstrator: Trial with 3 airports of an advanced forecasting system for proactive airport passenger flow management.</p> <p>Algorithmic model: Novel algorithmic model for proactive airport passenger flow management.</p> <p>Example 2 Publication of a scientific discovery on transparent electronics.</p> <p>New product: More sustainable electronic circuits.</p> <p>Three PhD students trained.</p>	<p>What dissemination, exploitation and communication measures will you apply to the results?</p> <p>Example 1 Exploitation: Patenting the algorithmic model.</p> <p>Dissemination towards the scientific community and airports: Scientific publication with the results of the large-scale demonstration.</p> <p>Communication towards citizens: An event in a shopping mall to show how the outcomes of the action are relevant to our everyday lives.</p> <p>Example 2 Exploitation of the new product: Patenting the new product; Licencing to major electronic companies.</p> <p>Dissemination towards the scientific community and industry: Participating at conferences; Developing a platform of material compositions for industry; Participation at EC project portfolios to disseminate the results as part of a group and maximise the visibility vis-à-vis companies.</p>	<p><i>Who will use or further up-take the results of the project? Who will benefit from the results of the project?</i></p> <p>Example 1 9 European airports: Schiphol, Brussels airport, etc.</p> <p>The European Union aviation safety agency.</p> <p>Air passengers (indirect).</p> <p>Example 2 End-users: consumers of electronic devices.</p> <p>Major electronic companies: Samsung, Apple, etc.</p> <p>Scientific community (field of transparent electronics).</p>	<p><i>What change do you expect to see after successful dissemination and exploitation of project results to the target group(s)?</i></p> <p>Example 1 Up-take by airports: 9 European airports adopt the advanced forecasting system demonstrated during the project.</p> <p>Example 2 High use of the scientific discovery published (measured with the relative rate of citation index of project publications).</p> <p>A major electronic company (Samsung or Apple) exploits/uses the new product in their manufacturing.</p>	<p><i>What are the expected wider scientific, economic and societal effects of the project contributing to the expected impacts outlined in the respective destination in the work programme?</i></p> <p>Example 1 Scientific: New breakthrough scientific discovery on passenger forecast modelling.</p> <p>Economic: Increased airport efficiency Size: 15% increase of maximum passenger capacity in European airports, leading to a 28% reduction in infrastructure expansion costs.</p> <p>Example 2 Scientific: New breakthrough scientific discovery on transparent electronics.</p> <p>Economic/Technological: A new market for touch enabled electronic devices.</p> <p>Societal: Lower climate impact of electronics manufacturing (including through material sourcing and waste management).</p>

- A modo de recordatorio
- Aspectos clave
- Detalles en el WP 2023-2024

WP 2023-24: Algunas condiciones en los “topics”

Specific conditions	
<i>Expected EU contribution per project</i>	The Commission estimates that an EU contribution of around EUR 5.00 million
<i>Indicative budget</i>	The total indicative budget for the topic is EUR 10.00 million.
<i>Type of Action</i>	Innovation Actions
<i>Admissibility conditions</i>	<p>The conditions are described in General Annex A. The following exceptions apply:</p> <p>Applicants submitting a proposal under the blind evaluation pilot (see General Annex F) must not disclose their organisation names, acronyms, logos, nor names of personnel in Part B of their first stage application (see General Annex E).</p>
<i>Eligibility conditions</i>	<p>The conditions are described in General Annex B. The following exceptions apply:</p> <p>The Joint Research Centre (JRC) may participate as member of the consortium selected for funding. O.....</p> <p>-----</p> <p>The following additional eligibility criteria apply: The proposals must use the multi-actor approach. See definition of the multi-actor approach in the introduction to this work programme part. O.....</p> <p>-----</p> <p>If projects use satellite-based earth observation, positioning, navigation and/or related timing data and services, beneficiaries must make use of Copernicus and/or Galileo/EGNOS (other data and services may additionally be used).</p>

Specific conditions	
<i>Technology Readiness Level</i>	Activities are expected to achieve TRL 6-7 by the end of the project – see General Annex B.
<i>Legal and financial set-up of the Grant Agreements</i>	<p>The rules are described in General Annex G. The following exceptions apply:</p> <p>Eligible costs will take the form of a lump sum as defined in the Decision of 7 July 2021 authorising the use of lump sum contributions under the Horizon Europe.... O.....</p> <p>-----</p> <p>Beneficiaries may provide financial support to third parties.</p> <p>The support to third parties can only be provided in the form of grants. The maximum amount to be granted to each third party is EUR XXX.</p>
<i>Procedure</i>	<p>The procedure is described in General Annex F. The following exceptions apply:</p> <p>This topic is part of the blind evaluation pilot under which first stage proposals will be evaluated blindly.</p>

Scope.-

Social Science and Humanities

Blind evaluation pilot (I)

NEW

<i>Admissibility conditions</i>	<p>The conditions are described in General Annex A. The following exceptions apply:</p> <p>Applicants submitting a proposal under the blind evaluation pilot (see General Annex F) must not disclose their organisation names, acronyms, logos, nor names of personnel in Part B of their first stage application (see General Annex E).</p>
---------------------------------	--

Clúster 6.- Aplica a todas las convocatorias en “two stage”

2023 → 2 convocatorias

2024 → 5 convocaorias

NEW **admissibility criterion:** Applicants submitting a proposal under the blind evaluation pilot must not disclose their **organisation names, acronyms, logos nor names of personnel** in Part B of their first-stage application.

No identification data can be mentioned by applicants in the proposal's **Part B**, otherwise **inadmissible proposal**

Process

The concept of Blind evaluation requires that experts in the SEP evaluation session do not know the consortium structure and the applicant(s) involved. To accomplish this, the following safeguards are in place:

Part A

- Will not be transmitted to evaluators.

Part B

- If proposals **include any identification** of the applicant in Part B, the proposal will be declared **inadmissible** and will be **rejected**.

Blind Evaluation Pilot (II)

NEW

TITLE OF THE PROPOSAL

⚠ This proposal is submitted to a call that is evaluated blindly (evaluators do not know the identity of participants in proposal). You must not disclose applicants' organisation names, acronyms, logos nor names of personnel in Part B of your application. If you do, your proposal will be declared inadmissible. You include information on the identity of the participants in the proposal Part A.

1.1 Objectives and ambition

Describe how your project goes beyond the state-of-the-art, and the extent the proposed work is ambitious. Indicate any exceptional ground-breaking R&I, novel concepts and approaches, new products,

⚠ *The description of the above should be provided in general terms, to preserve the **anonymity of the proposal**.*

1.2 Methodology

○ Any national or international research and innovation activities whose results will feed into the project, and how that link will be established.

⚠ *The point above refers to activities in general and not to those carried out by the participants. It should be nevertheless kept in mind that the description has to be in line with the **anonymity of the proposal**.*

2.1 Project's pathways towards impact

(c) Describe any requirements and potential barriers -

⚠ *When describing the above, please pay attention to preserve the **anonymity of the proposal**.*

Multi-Actor Approach (MAA)

<i>Eligibility conditions</i>	The following additional eligibility criteria apply : The proposals must use the multi-actor approach . See definition of the multi-actor approach in the introduction to this work programme part.
-------------------------------	---

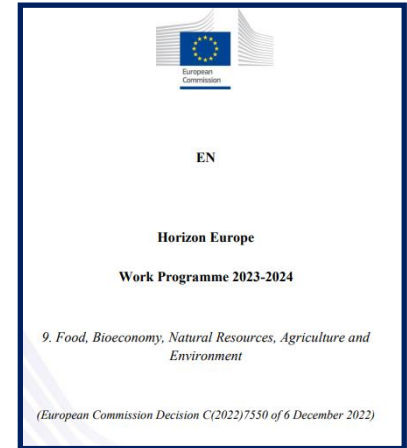

- **Cluster 6: WP 2023-2024**
 - **Multi-Actor Approach (MAA)** se requiere en **82** de los 176 *topics* (**47%**)
 - Todo tipo de instrumentos: **IAS, RIAs, CSAs** y **Co-funded partnerships**
- ¿Qué cambia en 2023-2024? **MAA se extiende a más áreas** de las que están bajo la EIP – AGRI.

NEW

¿Qué es el MAA?

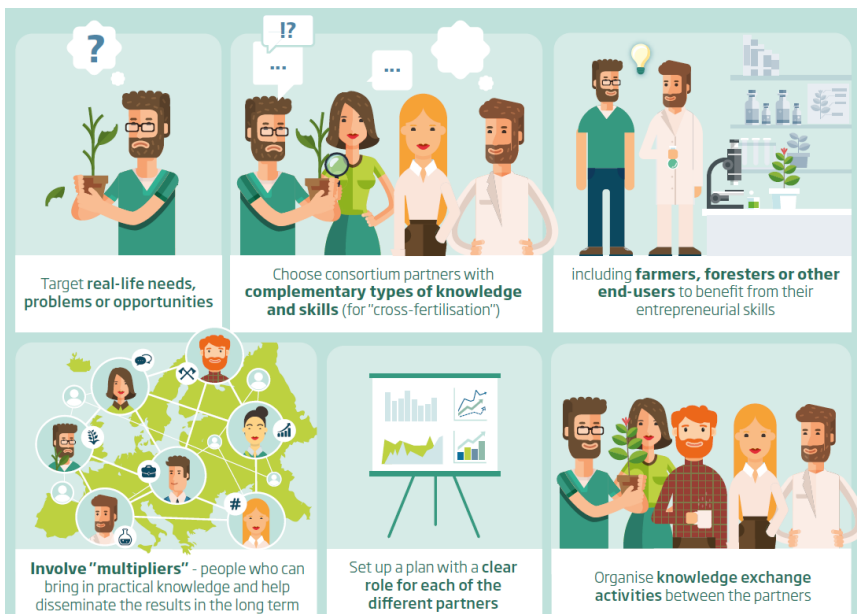

Requerimientos específicos proyectos Multi-actor

- **INTRODUCCIÓN** del **WP 2023-24 del Clúster 6** (pág. 21 a 23)
 - **Concepto:**
 - MAA is a form of Responsible Research and Innovation (RRI);
 - Demand-driven, shared and relevant to society;
 - More than just widely disseminating the results;
 - Involvement of a targeted array of actors, (end-) users;
 - All over the whole course of the project;
 - Co-creation process and co-ownership of results: from science, practice and intermediaries;
 - **Requisitos (7)** que hay cumplir /demostrar en la propuesta.

MAA.- 7 Requisitos a demostrar en la propuesta

https://ec.europa.eu/eip/agriculture/sites/default/files/eip-agri_brochure_multi-actor_projects_2017_en_web.pdf

1. Target real-life needs, problems or opportunities

2. Choose consortium partners with complementary types of knowledge and skills (for "cross-fertilisation")

3. including farmers, foresters or other end-users to benefit from their entrepreneurial skills

4. Involve "multipliers" - people who can bring in practical knowledge and help disseminate the results in the long term

5. Set up a plan with a clear role for each of the different partners

6. Organise knowledge exchange activities between the partners

7. Bridge the gap between research and practice by facilitating discussions

8. Involve interactive innovation groups such as EIP-AGRI Operational Groups

9. All partners must co-create and co-decide throughout the project

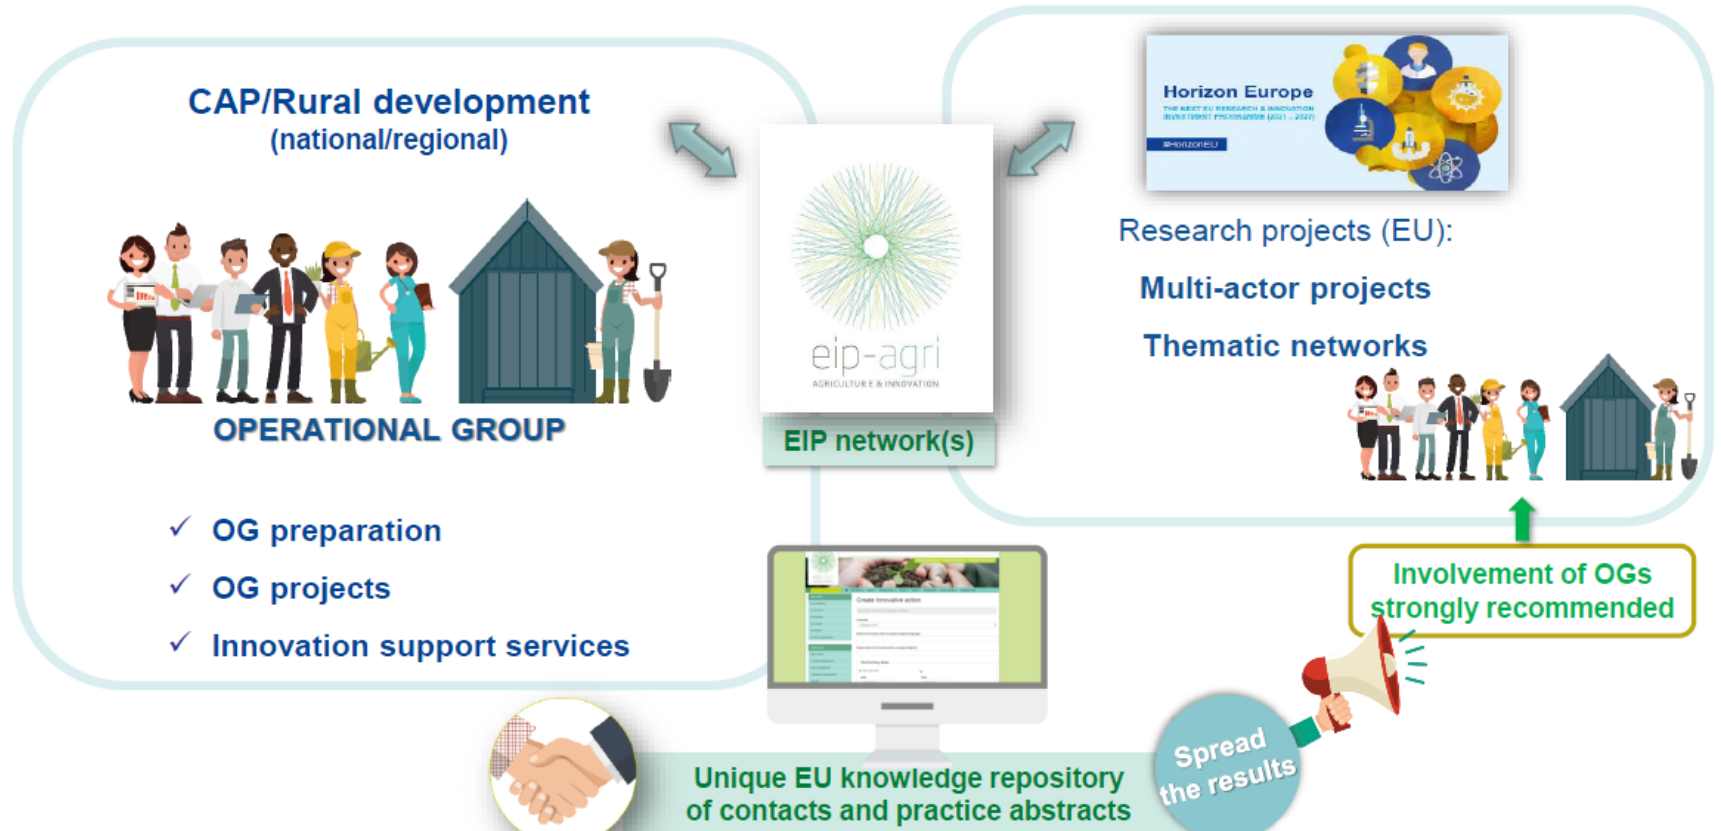

10. Illustrate how the project complements existing research and best practices

11. Produce practical information which feeds into the most common existing dissemination channels ...

12. ... and write easily understandable practice abstracts in the common EIP format

Ojo – folleto de 2017

¿Qué relación hay entre HE - MAA y la EIP Agri?

Eligibility conditions

The conditions are described in General Annex B. The following exceptions apply:

The **Joint Research Centre (JRC)** may participate as member of the consortium selected for funding.

JRC participation

- Topics en los que el **JRC** podría participar como miembro de los consorcios seleccionados para financiación:

Clúster 6 → 39 de 176 topics (22%)

Clima.Clúster 5 → 1 de 20 topics (5%)

- Todo tipo de instrumentos: **IAS, RIAs, CSAs y partenariado Co-fund**
- La cooperación con el **JRC** también se recomienda **en otros topics**.

Two scenarios for JRC's involvement in HE actions

1. JRC as a beneficiary requesting zero funding – signing grant agreement
2. JRC as an associated partner – not signing agreement, (potentially) signing the consortium agreement

2. JRC as a **non-beneficiary** – in situations when the JRC is not mentioned in the topic at all (e.g. via collaboration agreement, membership in the scientific advisory board, etc.)

Joint Research Centre, JRC*

<i>Eligibility conditions</i>	The conditions are described in General Annex B. The following exceptions apply: The Joint Research Centre (JRC) may participate as member of the consortium selected for funding.
-------------------------------	--

- **Where provided for in the specific call conditions**, applicants may include in their proposals the possible contribution of the JRC but **the JRC will not participate in the preparation and submission of the proposal.**
- Applicants will **indicate the contribution that the JRC could bring to the project** based on the scope of the topic text.
- **After the evaluation process**, the **JRC and the consortium** selected for funding **may come to an agreement** on the specific terms of the participation of the JRC.
- If an agreement is found, the **JRC** may accede to the grant agreement as **beneficiary requesting zero funding or participate as an associated partner** and would accede to the consortium as a member.

[*General Annexes WP 2023-2024](#)

Copernicus y/o Galileo/EGNOS

Eligibility conditions

The conditions are described in General Annex B. The following exceptions apply:

If projects use satellite-based earth observation, positioning, navigation and/or related timing data and services, **beneficiaries must make use of Copernicus and/or Galileo/EGNOS** (other data and services may additionally be used).

<i>Legal and financial set-up of the Grant Agreements</i>	The rules are described in General Annex G. The following exceptions apply: Eligible costs will take the form of a lump sum as defined in the Decision of 7 July 2021 authorising the use of lump sum contributions under the Horizon Europe....
---	--

Lump sum (II)

- Topics en los que el “**lump sum**” es una **condición específica**:
Cluster 6: 56 topics (≈ 32% del total del WP)
Clima. Clúster 5: 5 topics (25% del total)
- **Por qué usar “lump sum”???**

Horizon Europe uses lump sum funding to **reduce administration and financial errors**. Lump sums make the programme simpler by removing the need to report actual costs. This means **easier access to the programme**, especially for small organisations and newcomers, who often lack the experience and capacity to cope with the complex rules for actual costs.

Lump sums are **defined up-front** and fixed in the grant agreement. They are **paid upon completion of the activities** in work packages.

Beyond that, the planning, evaluation, and execution of projects does not change much. In particular, the payment of lump sums is **not dependent on successful outcomes** (which are never certain in research) and follows **the standard payment schedule**. Lump sum projects enjoy the **same degree of flexibility**, and their performance is **judged by the same standards**.

Legal and financial set-up of the Grant Agreements

The rules are described in General Annex G. The following exceptions apply:

Eligible costs will take the form of a lump sum as defined in the Decision of 7 July 2021 authorising the use of lump sum contributions under the Horizon Europe....

Lump sum (II)

HOW DOES LUMP SUM FUNDING WORK IN PRACTICE? A QUICK GUIDE

01

LUMP SUM PROPOSALS

- Use the standard Horizon Europe proposal template. Address expected impacts and outcomes as in any Horizon proposal.
- No change in project design, except that work packages with a long duration may be split along the reporting periods. In this way, the relevant activities can be paid at the end of the reporting period.
- You need to provide a detailed breakdown of cost estimates to define and justify the lump sum. The estimates must be an approximation of your actual costs and meet the eligibility criteria of Horizon Europe. These cost details are needed to

Horizon Europe Programme

Detailed lump sum budget

Generate the Excel file in macro-free format
Ready for the online submission system

Instructions

Go to Beneficiaries and Affiliated Entities list

! Double click buttons !

Go to Work packages list

GENERAL INSTRUCTIONS

This workbook enables you to present the detailed estimation of costs of your lump sum project and to calculate the lump sum breakdown per beneficiary and per work package. It must be uploaded as an additional document at the 'Proposal forms'-step of proposal submission. This is mandatory. If you do not upload the Excel workbook, the proposal submission will be blocked.

For more information on lump sum proposals and grants, see the guidance document "How to manage your lump sum grant". Comprehensive guidance and background on [lump sum funding under Horizon Europe](#) is available on the Funding & Tenders Portal.

We recommend using Excel 2013 (Windows) / Excel 2016 (Mac OS) or more recent.

The only currency used in this workbook is EURO (€).

You **must complete** the following sheets: 'BE list' – 'WP list' – 'BE' (one sheet for each beneficiary) – 'Depreciation costs' (if any). The appropriate number of individual beneficiary sheets ('BE') will be generated automatically with data from the 'BE list' and 'WP list' sheets.

The information in this workbook **must correspond** to the main proposal. For example, the list of beneficiaries and the list of work packages must be the same. Likewise, the tables in section 3.1 of Part B of the proposal must be in line with this workbook (e.g., table 3.1h 'purchase costs', and table 3.1i 'internally invoiced goods and services').

BE LIST

In the 'BE list', you can add as many beneficiaries and as many affiliated entities as you need. To add beneficiaries, click on the "Add BE" button. To add an affiliated entity, click on the "Add AE" button next to the beneficiary concerned.

For each beneficiary and each affiliated entity, you must select the country and the appropriate funding rate in the drop-down menus. The funding rates are used in the automatic calculation of the lump sum breakdown. For RIA and CSA topics, the funding rate is always 100%. For IA topics, the funding rate is 70% (except for non-profit legal entities, where a rate of up to 100% applies). For more information on the funding rate, please refer to your topic description.

Once you have completed the 'BE list' sheet, click the "Apply changes" button to generate the corresponding sheets in the Excel workbook.

To delete a beneficiary from the 'BE list', click the "Clear BE" button next to it. Likewise, to delete an affiliated entity, click the "Clear AE" button next to it. The first beneficiary BE1 cannot be deleted, but its details can be modified. Click "Apply changes" to delete the corresponding sheets from the workbook. Deleted beneficiary sheets then appear as a backup and are excluded from the calculation. Data of deleted affiliated entities are not saved as a backup.

Lump sum(IV)

What are the **Type 1** and **Type 2** options under the Horizon Europe lump sum funding scheme?

Two options for setting the lump sum were put forward.

In **Type 1**, the lump sum is prefixed by the Commission in the call for proposals and your budget must equal (add up to) the prefixed total. Proposals need to describe the efforts and resources applicants commit to mobilise for this amount. The applicants must provide a proposed split of lump sum per work package and per beneficiary and affiliated entity.

In **Type 2**, the amount of the lump sum is proposed by the applicants in their proposal, based on their estimated direct and indirect project costs. Applicants must provide detailed cost estimations and propose a breakdown of lump sum shares per work package and per beneficiary (and affiliated entity if any).

Some additional details

- **Page limits.**- For topics using lump sum funding, the limit for **‘Research and Innovation’ actions and ‘Innovation’ actions** is **50 pages** and the limit for **‘Coordination and support’ action** is **33 pages**.
- For lump sum grants proposals, **comments on the detailed lump sum budget table** will be **provided in the Evaluation Summary Report** only for proposals invited to grant agreement preparation (or placed in the reserve list) and ones rejected (in part) due to significant overestimation or underestimation of costs.

Cascade funding (I)

<i>Legal and financial set-up of the Grant Agreements</i>	The rules are described in General Annex G. The following exceptions apply: Beneficiaries may provide financial support to third parties. The support to third parties can only be provided in the form of grants . The maximum amount to be granted to each third party is EUR 60.000.
---	--

Financial support to third parties

- **Where the specific call conditions allow for financial support to third parties**, the applicants must clearly describe the objectives and the expected results, including the elements listed in the application template.
- The **calls** to be launched **must fulfilled some conditions**, (General Annexes WP 2023-2024)
Further conditions may be stipulated in the specific conditions for the topic.
- For more information, see [AGA — Annotated Model Grant Agreement](#), Articles 6.2.D.1 and 9.4.

Cascade funding (II)

Call: [insert call identifier] — [insert call name]

EU Grants: Application form (HE RIA and IA): V3.2 – 15.11.2022

ANNEXES TO PROPOSAL PART B

Some calls may ask to upload annexes to proposal part B. The annexes must be uploaded as separate documents in the submission system. The most common annexes to be uploaded in Horizon Europe are (standard templates are published in the Funding & Tenders portal):

- **CLINICAL TRIALS:** Annex with information on clinical trials
- **FINANCIAL SUPPORT TO THIRD PARTIES:** Annex with information on financial support to third parties.
- **CALLS FLAGGED AS SECURITY SENSITIVE:** Annex with information on security aspects.
- **ETHICS:** ethics self-assessment should be included in proposal part A. However, in calls where several serious ethics issues are expected, the character limited in this section of proposal part A may not be sufficient for participants to give all necessary information. In those cases, participants may include additional information in an annex to proposal part B.

EU Grants: Info on financial support to third parties (HE): V2.0 – 15.01.2022

INFORMATION ON FINANCIAL SUPPORT TO THIRD PARTIES

For calls that allow 'Financial support to third parties', project participants must add this document to the application and upload it as separate annex to the proposal part B in the Submission System.

⚠ Fill in only the applicable section to your call (Financial support in the form of grants or prizes).

⚠ For more information on terms and conditions: see Work Programme General Annexes [section B](#) and Horizon Europe Model Grant Agreement Articles 6.2.D.1 and 9.4.

Financial support in the form of a grant awarded after a call for proposals

Where this possibility is indicated under the relevant topic in the Work Programme and in the relevant calls for proposals, provide a description of the use of financial support to third parties. This description must address at least the following:

1. clearly detail the objectives and the results to be obtained and
2. contain the following specifications (as a minimum):
 - a) the maximum amount of financial support for each third party; this amount may not exceed 60 000 EUR, unless explicitly mentioned in the Work Programme topic. If your project requires a higher amount per third party than the threshold amount set in the call conditions, justify and explain why this is necessary in order to fulfil your project's objectives.
 - b) the criteria for calculating the exact amount of the financial support
 - c) the different types of activity that qualify for financial support, on the basis of a closed list
 - d) the persons or categories of persons that may receive financial support, and
 - e) the criteria for giving financial support

Please check in the Work Programme and call for proposals if there are other conditions that apply and, if so, include them in the specifications or in any other element of the proposal as appropriate.

Work as an expert

The European Union Institutions appoint external experts to assist in the evaluation of grant applications, projects and tenders, and to provide opinions and advice in specific cases.

Being an expert for the European Commission

In particular, experts assist in:

- Evaluation of proposals, prize applications and tenders
- Monitoring of actions, grant agreements, public procurement contracts

In addition, experts provide opinion and advise on:

- Preparation, implementation and evaluation of EU programmes and design of policies.

In order to select experts, the European Union Institutions publish regularly calls for expression of interest (see list below) detailing the selection criteria, the required expertise, the description of the tasks, their duration and the conditions of remuneration.

Interested? Please join the database of external experts!

Register as expert

As new expert, you will be first requested to create your EU login account and register your profile.

Registered experts can update the profile via the My Expert Area after login.

Calls for expressions of interest for experts

Horizonte Europa – Plan Estratégico 2025-2027

NEWS ARTICLE | 1 December 2022 | Directorate-General for Research and Innovation

Now open: Largest public consultation ever held on the past, present and future of the European research and innovation programmes 2014-2027

The public consultation allows participants to:

- Point out the achievements and shortcomings of the previous EU research and innovation programme Horizon 2020, its relevance and the procedures associated with the application process and funding management;
- Express views on Horizon Europe's design and implementation up until now;
- Identify future priorities for Horizon Europe's Strategic Plan 2025-2027, providing inputs on emerging research and innovation needs, on synergies across EU programmes, etc.
